Logistex provide automated materials handling and software (WMS) solutions for warehousing operations and we are currently seeking a

Integration Test Manager

Integration Test Manager

Location: Flexible, Midlands Based preferred

Position Type: Full-Time, Permanent

Salary: Competitive, plus excellent benefits package to include company car or car allowance, PMI, 25 days holiday plus bank holidays rising with service, paid volunteer days, tax free childcare, cycle to work scheme

About Logistex:

Logistex is a leader in delivering cutting-edge automated logistics solutions to some of the world's top retailers and e-commerce businesses. As an Employee-Owned Trust (EOT), we place a strong emphasis on collaboration and employee engagement, with every team member playing a crucial role in our success. We've just secured our largest project to date—a landmark, multi-million-pound programme that will transform the future of logistics automation. This is an exciting time to join us, especially as we continue to grow and innovate in the industry.

We are seeking a highly experienced Integration Test Manager to lead the testing efforts on this ground-breaking project. In this role, you'll be responsible for ensuring the flawless integration and validation of our advanced automation systems, coordinating with various teams to ensure everything runs smoothly from design to delivery.

Key Responsibilities:

- **Lead and Manage Testing Activities:** Develop and oversee comprehensive integration test strategies and plans for our large-scale automation systems, ensuring alignment with project requirements.
- **Team Leadership:** Manage a team of integration test engineers, providing guidance, support, and technical expertise to ensure the successful execution of test plans.
- **System Integration Testing:** Oversee the integration testing process, from hardware and software components to the full system, ensuring all elements work together seamlessly.
- **Quality Assurance:** Ensure that all testing is conducted in line with industry standards and best practices, maintaining the highest levels of quality and system reliability.
- **Test Reporting:** Create detailed test documentation, including test plans, test cases, and test reports, and communicate test results and system issues to senior management and project stakeholders.
- **On-Site Support:** Oversee the commissioning and final testing of systems on customer sites, ensuring smooth handover and operation.

Qualifications & Experience:

- **Education:** Degree in Engineering, Computer Science, or a related technical discipline would be an advantage but experience is more important
- **Experience:**
    - Proven track record in managing system integration testing within complex automation, logistics, or material handling environments.
    - Strong experience with warehouse management systems (WMS), control systems, and automation technologies.
- **Leadership Skills:** Demonstrated ability to lead and manage a team of engineers, fostering collaboration and delivering results under tight deadlines.
- **Tools & Technology:** Familiarity with test automation frameworks, integration tools, and system testing methodologies.

What We Offer:

- **Ownership and Influence:** As part of an **Employee-Owned Trust (EOT)**, you'll have a real say in the direction of the company and share in its successes.
- **Exciting Challenge:** Be at the forefront of delivering our **largest project to date**, shaping the future of automated logistics solutions

Logistex is an Equal Opportunities Employer, committed to fostering an inclusive, diverse workplace where all individuals are valued and treated with respect. We welcome applicants from all backgrounds, believing that diversity drives innovation.
