

Logistex provide automated materials handling and software (WMS) solutions for warehousing operations and we are currently seeking a

Integration Test Engineer

Integration Test Engineer at Logistex

Location: Midlands based preferred

Position Type: Full-Time, Permanent

Salary: Competitive, plus excellent benefits package to include company car or car allowance, 25 days holiday, increasing with service, paid volunteer days, cycle to work scheme, tax free childcare

As an Employee-Owned Trust (EOT), our people are at the heart of our success. Now, we're proud to announce we've secured our largest project to date—a multi-million-pound contract that will push the boundaries of logistics automation. This is a unique opportunity to join a thriving company and contribute to a game-changing project. We are looking for a skilled Integration Test Engineer to join our dynamic team. In this role, you'll ensure the seamless integration and functionality of our advanced automation systems, playing a critical part in the success of this landmark project.

Key Responsibilities:

- Develop and execute test plans to validate system integration for large-scale automated warehouse solutions.
- Perform end-to-end testing, identifying and resolving issues to ensure systems meet functional and performance requirements.
- Work closely with software developers, controls engineers, and project teams to troubleshoot and refine systems.
- Document test results, create reports, and recommend improvements to enhance system reliability.
- Support the commissioning and installation of systems on customer sites, ensuring smooth handover and operation.
- Ensure all testing complies with industry standards and client specifications.

Qualifications & Experience:

- Degree in Engineering, Computer Science, or a related field would be an advantage
- Experience in integration and system testing, ideally within automation, logistics, or material handling industries.
- Strong analytical and problem-solving skills with a keen eye for detail.
- Proficiency in test management tools, automation frameworks, and scripting.
- Knowledge of warehouse management systems (WMS), control systems, and automation technologies is advantageous.
- Ability to work collaboratively across teams and adapt in a fast-paced, project-driven environment.

Why Join Logistex?

- Be part of our largest project to date, where your work will make a significant impact on the future of automation.
- Join an Employee-Owned Trust (EOT)—as co-owners, you'll have a real say in the direction of the company and share in our success.
- Competitive salary with a generous benefits package, including health, pension, and performance-related bonuses.
- Ongoing professional development and career progression opportunities.
- A supportive, collaborative culture that values innovation and teamwork.

This is your chance to be part of a leading-edge project in a company where you have a voice. If you're ready to take on a new challenge and be a key player in transforming logistics automation, we want to hear from you!

Apply now to be part of our exciting journey! Send your CV with a covering letter to careers@logistex.com

Logistex is an **Equal Opportunities Employer**, committed to fostering an inclusive, diverse workplace where all individuals are valued and treated with respect. We welcome applicants from all backgrounds, believing that diversity drives innovation.
